ABOUT US

GIS is a professional business fraternity with the goal of developing our members into mature, professional individuals to help send them off into the professional world. Although we have a focus on international risk management, insurance, and actuarial science, we are also open to all Drake majors. Our core competencies are professionalism, leadership, knowledge, community involvement, and brotherhood, and we do our best to foster these competencies through service opportunities, guest speakers, networking opportunities, professional development events, and much more.
